

Cover for Trolley

Cover fitted for trolleys (1012001), available in two sizes, Classic or Gold, and made to protect racing lines or water polo lines from exposure to harmful sun rays, dirty rain and sandy winds. These covers are made from a very special fabric, used by car manufacturers' protecting new cars. The material is breathable, with an excellent UV-protection and with an anti-repellent. Keeps moisture out, lets the lines dry after use, keeps them clean and protects against harmful UV-rays.

A cover is great to protect and prolong the product life of your lane lines. It is always recommended that, whenever possible, racing lane lines stored should be rinsed with clear water and kept in a well ventilated area, out of direct sunlight and harmful UV-rays.

There are two sizes available, one Classic (smaller) and one Gold (larger) cover, one for each trolley size.

Another unique feature is that this cover comes with a practical storage pouch. This pouch can be strapped on the trolley side, when not in use.

Unique qualities:

- Practical storage pouch
- Two sizes are available
