

Water Polo Goal Multi PRO 2500 mm

Art. No. 1511026

With its unique design, Multi PRO 2500 mm is suitable for juniors as well as beach water polo players. This is surely the lightest professional water polo goal on the market weighing only 26 kg! It uses the same reliable frame construction as our official FINA water polo goal. The floating side pontoons are made with a strong foam to ensure a light weight solution and thus easy to bring in and out of the pool. The depth is less, than our Official FINA goal, to fit more pool dimensions, however add-on sections can be purchased separately to increase depth.

Transport wheels, for ease of daily handling, are also available as an add-on purchase.

Advantages:

- Lightest professional goal on the market
- Less depth to fit more pool dimensions
- Easily folded for storage
- Possible extenders to increase depth when needed (purchased separately)*
- Transport wheels available as an add-on (purchased separately)*

Product Information
